

Notes from Initial Build

Creative Director: Max Francisco

Designer/Developer: Helen Piloto

- Overall, the site is looking pretty good rn, switching out the script for the sans serif was a good move, and structure of everything is working well
- I like the top nav a lot
 - Nice hover state + active state on each tab
 - Large image at the top of each page looks good, feels a lot bolder than previous versions
- Responsiveness (showing up differently rn on pc vs. mac)
 - Top margin, title text doesn't show up at first view for me
- Switch crew image to one of your alternate ones
 - To fit the background color for the crew section/potentially changing background color on crew section
- Adding background/highlight on navigation so it stays legible as you scroll
- Adding footer
